Notice Given The City Clerk was asked if notices had been given as required by law. She replied in the affirmative and advised that no written communications had been received.

Staff Report Mr. Gaudio, Project and Real Estate Manager, reported that on April 25, 2000, the Agency purchased two properties, 1011 West Burbank Boulevard (former State Farm building) and 123 West Burbank Boulevard (former Burbank Animal Hospital), for the Five Points Intersection Realignment Project (Five Points). He noted that both properties have been demolished.

Next, he explained that the State Farm and Animal Hospital properties were acquired for \$2,007,814 and \$675,000 respectively by the Agency in advance of receiving California Transportation Commission (CTC) authorization because both properties were offered to the City by the property owners early in the process and because they are both critical to the Five Points Project. In order to attempt to preserve the eligibility for reimbursement to the City for the acquisition of the properties for the Five Points Project, he said the Agency acquired the properties with the intention of conveying the properties to the City after the CTC had authorized the City to proceed with the Project.

Mr. Gaudio said the transfer of property from the Agency to the City is being made under the authority of Health and Safety Code Section 33445. He said this Section gives the Agency the authority to pay for all or part of the cost of the value of land and the cost of the installation and construction of publicly owned improvements within or without the project area with the appropriate findings by the legislative body.

He then discussed that this public hearing is required by the Health and Safety Code prior to selling property acquired with Agency tax increment funds. He said the purpose of the hearing is for the City and the Agency to consider approving the transfer of two Agency parcels to the City through the terms of a Cooperation Agreement. He said the only City funds available to reimburse the Agency are Metropolitan Transportation Authority (MTA) grant funds allocated for the acquisition. He noted that the MTA grant, once received, would only contribute \$632,000 for the acquisition as the remaining \$8,760,000 grant balance has been programmed for construction costs.

Lastly, Mr. Gaudio said that the acquisitions will assist in eliminating blight in the Golden State Project Area because: the acquisitions are critical to the completion of the Five Points Realignment Project; it will correct a troublesome traffic bottleneck; the Five Points Project will reduce traffic congestion through the intersection and provide improved access to the Golden State Project Area; and, the realigned intersection and bridge widening will significantly reduce congestion from present levels. He noted that by providing needed traffic mitigation improvements, undertaking of the project will assist in the future development of vacant or other underutilized properties in the Golden State Project Area.

Hearing  
Closed

There being no response to the Mayor's invitation for oral comment, the hearing was declared closed.

Motion

It was moved by Mr. Golonski and seconded by Mrs. Murphy that "the following resolution be passed and adopted:"

Water Quality  
Update

Power, reported on the request from the City Council at the October 10, 2000 meeting for staff to begin providing weekly oral presentations updating the Council and public on Burbank's water quality. He began by discussing the meeting held this day with the Environmental Protection Agency and Lockheed Martin in San Francisco to review progress in resolving the Burbank Operable Unit production problems. He noted that as a result of this meeting, staff was informed that the City may be taking over full operation of the Unit on March 7, 2001.

Next, he discussed the following upcoming actions: staff will meet tomorrow with the California Department of Health Services regarding implementation of Senate Bill 2127 (related to water quality testing); McGuire Environmental Consultants will make a presentation to the Council on chromium treatment cost findings on February 13, 2001; and, staff will present a proposed resolution to the Council amending the Fee Resolution to accommodate the implementation of "Providing Customers a Water Quality Sampling Service" on February 13, 2001.

The City Council received the report.

201-2  
FY 2000-01  
Work Program  
(Mgmt. Svcs. &  
Financial Svcs.)

A report was received from Mr. Hess, Administrative Analyst, which stated that at the January 16, 2001 meeting, the City Council initiated discussion on the mid-year review of the Fiscal Year (FY) 2000-01 Work Program. The report stated that staff was recommending that the City Council consider the objectives by department on subsequent agendas to allow the Council adequate opportunity to review each of the 369 objectives while continuing the remaining City business on the agenda. The report noted that the Management Services and Financial Services Departments objectives would be discussed at this meeting.

Mr. Nicoll, Management Services Director, discussed the following Management Services Work Program items: Complete all necessary preparations to conduct a Fire Fighter entrance exam and eligibility list including minority outreach efforts; conduct a Fire Engineer promotional exam; Achieve a five percent reduction in the timeline of hiring for new hires and promotions; Increase job opportunities for the developmentally disabled and vision impaired; Provide full access to available jobs and on-line job applications through the website; Create a central database for survey cities to facilitate the use of labor and organizational data; Explore the

alternatives of using full-time, part-time and task specific employees to meet the varied service needs; Continue to provide supervisory training for managers and supervisors, including diversity, sexual harassment, violence in the workplace, writing and presentation skills, and computer applications; Implement and complete salary surveys for International Brotherhood of Electrical Workers and Burbank City Employees Association positions; Negotiate a multi-year labor contract with the Burbank Police Officers Association, Burbank Fire Fighters, Burbank Fire Fighters Chief Officers Unit and the Burbank Management Association; Revise classification specifications in accordance with Federal requirements for all recruited positions in 2000-01; Evaluate how we do annual salary surveys; Develop incentives to recruit and retain safety personnel; and, Follow-up on facilitating/promoting blood donation drives.

Mr. Hanway, Financial Services Director, discussed the following Financial Services Work Program items: Prepare a GASB 34 implementation plan; Implement an in-house collection function; Implement payroll direct deposit; Monitor E-Commerce taxation issues and oppose legislation which places sales tax revenues at risk; Review bond trustee relationships to determine the need for a Request for Proposal for a successor trustee; Coordinate the City's internal audit program, including transient occupancy tax, Outdoor bus shelter agreement, paramedic billing including membership program, Starlight Bowl, Perform Arts grants, and receivable systems; Coordinate grant writing contract; and, Develop and implement procedures for acceptance of credit cards for fee payment.

The City Council reviewed the Work Program items pertaining to the Management Services and Financial Services Departments.

1503-1  
405-2  
405-3  
Joint Tri-City  
Authority for  
Addtl.  
Generating  
Facilities

Mr. Davis, General Manager, Burbank Water and Power (BWP), reported on the recent State of California energy emergency whereby a lack of adequate reliability and supply of electricity are jeopardizing the health and welfare of the people of California, as well as the viability of the State's economy. He said that one way to resolve this emergency is through the construction of new electrical power plants and noted that the cities of Burbank, Glendale and Pasadena have existing power plant sites upon which new, more efficient, and less polluting power plants could be built.

He discussed that the City Managers of the cities of Burbank, Glendale and Pasadena, and the General Managers of the cities' utilities believe that the construction of these new

2/6/01

facilities could best be accomplished through either a Joint Operating Agreement or through the creation of an interim Joint Powers Authority. As such, he said it is appropriate at this time to engage a consultant to study this matter and recommend the best method to construct the proposed new power plants. He noted that Burbank's share of the cost of the joint study is \$60,000.

Motion It was moved by Mrs. Murphy and seconded by Mr. Kramer that "the following resolution be passed and adopted:"

1503-1 RESOLUTION NO. 25,926:  
405-2 A RESOLUTION OF THE COUNCIL OF THE CITY OF BURBANK  
405-3 AUTHORIZING A JOINT STUDY WITH THE CITIES OF  
Joint Tri-City GLENDALE AND PASADENA TO DETERMINE THE  
Authority for DESIRABILITY OF FORMING AN INTERIM JOINT TRI-CITY  
Addtl. AUTHORITY FOR THE PURPOSE OF CONSTRUCTING  
Generating ADDITIONAL GENERATING FACILITIES ON THE CITIES  
Facilities EXISTING GENERATING SITES AND AUTHORIZING THE  
EXPENDITURE OF UP TO \$60,000 IN CONNECTION  
THEREWITH.

Adopted The resolution was adopted by the following vote:

Ayes: Council Members Golonski, Kramer, Laurell, Murphy and Wiggins.

Noes: Council Members None.

Absent: Council Members None.

1503 Mr. Fletcher, Assistant General Manager, Burbank Water and  
801-2 Power (BWP), reported that the City has had its current local  
Restoring Mag. generation units for over 40 years. Currently, he said there are  
4 Generating two active steam units and three combustion turbine units  
Unit that are powered by jet engines and start quickly.

In September 1996, he said the State of California passed the California Electricity Restructuring Act which was intended to create a competitive market for electric generation. At that time, he said it was widely expected that this market would quickly come about and cause spot prices to be \$30 per megawatthour (MWH) or less within a few years. He noted that prices for electrical power in 1996 and 1997 seemed to meet this expectation.

Mr. Fletcher discussed that because the cost of power from the Magnolia Power Plants exceeded \$40 per MWH, it was cheaper to purchase power instead. As a result, he said BWP shut down its Magnolia steam units in 1997 and reduced operating staff through attrition or retirements shortly afterward.

However, he explained that in October 1999 spot power prices began rising and by February 2000, BWP's power marketers recommended returning the Magnolia steam power plants to service; they had become, against all previous expectations, a cheaper alternative to buying spot power.

In a June 2000 study for BWP, Mr. Fletcher said that Black and Veatch estimated that it would cost from two to four million dollars to make Magnolia 4 operational. However, in December 2000, BWP had the generator disassembled and found that the problems were less serious than Black and Veatch and the factory had expected. On January 24, 2001, he said the factory informed BWP that the rotor required to be rewound and that the cost for such work would be an estimated \$425,000, bringing the total cost to repair the unit to \$759,852.

He further said that to cover the costs of restoring Magnolia 4 and staffing for its operation, the Council needs to increase BWP's budget authority by \$902,400, and needs to approve the "Power Plant Trainee" job title specification presented for Council consideration on this meeting agenda.

Mr. Fletcher concluded by stating that the fiscal impact of returning Magnolia 4 to service is positive relative to the alternatives. He said the avoided costs of spot power are more than sufficient to justify the expenses of restarting the Magnolia 4 Unit and hiring new power plant operators to operate it. He noted that the net savings are expected to be \$6.1 million even if Magnolia 4 were only operated this summer. However, he said it is important to note that the cost of providing power will be higher than previous projections, but without the operation of Magnolia 4, they would even be higher.

Motion It was moved by Mr. Golonski and seconded by Mrs. Murphy that "the following resolution be passed and adopted:"

1503 RESOLUTION NO. 25,927:  
801-2 A RESOLUTION OF THE COUNCIL OF THE CITY OF BURBANK  
Restoring Mag. AMENDING THE FISCAL YEAR 2000-2001 BUDGET FOR THE
