# ALLOWABLE STANDARD AND COMPACT PARKING WIDTH DIMENSION

CHART NO. I		CHART NO. 2	
STANDARD SIZE AUTOMOBILE SPACES ADJOINING ACCESS AISLE		COMPACT AUTOMOBILE SPACES ADJOINING ACCESS AISLE	
BASIC STALL WIDTH	ACCESS AISLE WIDTH	BASIC STALL WIDTH	ACCESS AISLE WIDTH
8'-6"	27'-4"	7'-6"	25'-4"
8'-8"	26'-8"	7'-10"	24'-0"
9'-0"	25'-4"	8'-2"	22'-8"
9'-4"	24'-0"	8'-4"	22'-0"

Where parking adjoining the access aisle is a combination of standard size and compact size automobile spaces, Chart No. 1 shall be used for determination of minimum access aisle width.

### SPECIAL REQUIREMENTS

### DRIVEWAY WIDTHS AND LOCATIONS

- A. 10' minimum in all zones.
- B. 19' minimum: when serving more than 40 cars in an "R" or "M" Zone; or more than 20 cars in a "C" Zone; or in lieu thereof there shall be two 10' minimum access driveways. Traffic Division approval for the location and size of driveways shall be obtained for every parking area or garage.

# DRIVEWAY SLOPES AND RAMPS (SEE SHEET 11)

- A. 20% maximum slope on driveway or ramp.
- B. 10% maximum cross slope of a driveway or ramp.
- C. 5% maximum slope in any direction in a parking stall.
- D. Transitions slopes are required when the slope of the driveway or ramp exceeds 10%. There shall be a maximum change in gradient of 10% in any 10 foot section of the driveway including the driveway approach within the street right of way, except that on a driveway sloping up from the property line the gradient within the first 5 feet from the property line shall not exceed 10%.

# PARKING STALL LOCATION

- A. No parking stall is to be located so that an automobile is required to back onto a major or secondary highway.
- B. No automobile is allowed to back from any lot onto a street unless the parking area or garage and the driveway leading to this parking serves no more than two dwelling units.
